SUMMARY

M.S. in Data Science student at Fordham University in New York, with full-time experience in data engineering, building database pipelines, data processing and model deployment. Skilled in Python, javascript and SQL.

WORK EXPERIENCE

Fordham University

Aug 2025 – May 2027 (Expected)

Graduate Research Assistant

New York, United States

- Analyzing NYC housing data from the UNHP (University Neighborhood Housing Program), and NYC Census tract, to identify correlations between socio-economic indicators of housing distress. Currently working on a paper to share findings and insights from research.

Turing

May 2025 – Aug 2025

JavaScript Model Trainer, Data Scientist

Palo Alto, CA, United States (Remote)

- Evaluated large language model (LLM) performance on text generation, code completion, and mathematical reasoning tasks using automated benchmarks and human evaluation. Worked with exact match and pass@k metrics to evaluate model accuracy.

RateEat, [link](#)

Oct 2023 - Oct 2024

Project Lead and Software Developer

Addis Ababa, Ethiopia

- Led a team of 9 developers as Project Lead to build a data warehousing platform for restaurants. Aggregated data for over 1,000 restaurants.
- I worked on automating data population using OCR for physical menus; and web scraping, and Google Places API for digital ones. Used LLMs as a semantic translator to structure data.
- I worked on mobile app development using Flutter/Dart. Contributed to 40% of mobile app code.

SkillBridge, [link](#)

Aug 2022 - Oct 2023

Software Developer

Addis Ababa, Ethiopia

- Worked on backend development for an AI-powered learning platform that helps graduating students prepare for national exams.
- Reduced average analytics query latency by 30% by redesigning indexes on PostgreSQL and optimizing Snowflake joins.
- Designed and implemented a RAG-based AI assistant for Math and Physics using LangChain, with embedding-based retrieval and multi-step reasoning chains to decompose complex problems. Improved benchmarked Math solution accuracy from 53% to 89% based on automated evaluation questions.

PROJECTS

Spoken Language Identification using DeepLearning Models, [link](#)

April - May 2026

Spoken Language identification for 9 languages from audio data using CNN and LSTM deep learning models.

NewYork TLC Uber and Lyft Data Analysis and Model Training, [link](#)

Dec - Dec 2025

NYC ride-sharing vehicles pattern analysis through supervised and unsupervised learning.

Customer Basket Analytics Data Mining, [link](#)

Jul - Aug 2025

Shopping behavior analysis (Python, pandas, scikit-learn, UMAP, HDBSCAN)

Chess bot Development, Reinforcement Learning, Search algorithm, [link](#)

Feb - Mar 2022

Reinforcement Learning, Search Algorithms, Magic Bitboards, Minimax algorithm, Zobrist Hashing

EDUCATION

Fordham University

M.S. Data Science, [4.00 GPA](#)

Aug 2025 – May 2027 Expected

New York, United States

- Relevant Courses: Data Mining, Data Visualization, Machine Learning, Machine Learning in Finance

Addis Ababa University

B.Sc. Software Engineering, a [Great distinction graduate](#).

Sept 2018 - Jun 2022

Addis Ababa, Ethiopia

- Graduated from Addis Ababa University, the 6th-ranked university in Africa, with [Great Distinction](#) honors.

CERTIFICATIONS

- Supervised Machine Learning: Regression and Classification, Stanford Online, [certificate](#)
- UNDP Machine Learning Trainee; United Nations Frontier Tech Leaders program 2025 graduate, [certificate](#)
- Africa to Silicon Valley 2022 graduate. 1 year data structures and algorithms training.
 - Top 15% problem solver on [LeetCode](#), solved 700+ questions across LeetCode and Codeforces.

VOLUNTARY ACTIVITIES

AddisCoder 2023 by Prof. Jelani Nelson

Jul 2023 - Aug 2023

Teaching Assistant

Addis Ababa, Ethiopia

- I volunteered as a teaching assistant for AddisCoder 2023, a program organized by **Prof. Jelani Nelson** from UC Berkeley to introduce high school students to Python programming, data structures, and algorithms.

Generative AI for Africa Hackathon

Aug 2023 - Nov 2023

Project Mentor, [certificate](#)

Addis Ababa, Ethiopia

- Mentored during **AI for Impact Hackathon**, organized by Ethiopia's **Ministry of Innovation** and **Addis Ababa University**.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, Dart

Frameworks & Libraries: TensorFlow, Scikit-learn, Pandas, Seaborn, LangChain, FastAPI, Beautiful Soup, React.js, Next.js, Flutter

Data Science: Classification & Clustering, Model Optimization, Learning Algorithms, Data Visualization, Exploratory Data Analysis, Unsupervised Learning

Technologies & Tools: Git, SQL, REST API, Docker, Kubernetes, Snowflake, Tableau, Google Cloud, AWS

ACHIEVEMENTS

- [IELTS Overall Band: 8.0](#)
- [GRE Quantitative Reasoning: 164/170](#)
- [Exhibitor at GITEX Africa 2024 \(Morocco\)](#)
- [Delegate from Ethiopia at World Youth Festival 2024](#)
